

You're all invited to our Official Dedication, Sunday, June 26, 2005, 1:00 – 5:00 pm

THE CENTER OF ANTICIPATION

A remarkable new hospital is on its way.
Best of all, it's not out of your way.

Come and tour St. Mark's Medical Center.

A hospital designed to change the way you think of hospitals. From **advanced technologies** rivaling those of major metropolitan institutions to a **level of service** surpassing that of any hospital anywhere, St. Mark's is making **compassionate care** the center of everything we do. Our guiding principles focus on **respect and care for the whole person**. Our beliefs center on the **Golden Rule** as the standard by which we treat every individual, and wish to be treated. The best news is, St. Mark's brings **all of this within reach**, so you don't have to travel to get the care you need. **We look forward to meeting you** at our Official Dedication, Sunday, June 26, 1:00 – 5:00 p.m. at our world-class facility just north of La Grange and south of Giddings on Highway 77. And that should make you feel better already.

**THE PEOPLE,
THE TECHNOLOGY,
THE IDEAL LOCATION**

Compassionate Care for Life

ST. MARK'S
MEDICAL CENTER

THE CENTER OF COMPASSION

Living by the Golden Rule

Imagine a hospital designed to change the way you think of hospitals. Whose guiding principles focus on respect and care for the whole person. Whose beliefs center on the Golden Rule as the standard by which we treat every individual. Whose very location fosters more considerate healthcare because it's close to home. At St. Mark's Medical Center, we're not just imagining this level of service, it's what we aim to deliver. We're adamant about making compassionate care the center of everything we do. And that's not so hard to achieve – when you begin by imagining how you'd like to be treated yourself.

THE CENTER OF TECHNOLOGY

Science that helps us know
the real you

These days, you hear the term high-tech far too often. At St. Mark's Medical Center, our goal is to make high-tech synonymous with high-touch – right here, close to home. By providing the very latest in imaging, computer, operating room, and communication technologies, we can provide you with diagnostic capabilities superior to those of many major metropolitan areas. With systems such as our Karl Stolz OR1® computer-operated room and Siemens SOMATOM® 64-slice CT scanner, you'll receive optimum care and results with minimal hassle. And to us, that's the real value of technology – to help us provide more informed, more compassionate care for you.

THE CENTER OF NURTURING

A Birthing Center
born out of compassion

What happier event is there than bringing a new baby into the world? At St. Mark's Medical Center, we've created a Birthing Center worthy of your happy event – bringing compassionate care to mothers, babies, and families. We offer parent and sibling tours, childbirth and breastfeeding classes – including a discount on childbirth classes when you pre-register with us. Have your baby in the beautiful, comfortable environment designed especially for you, including our labor, delivery, and postpartum rooms. The birth of your baby is special. And at St. Mark's, we couldn't be happier to give you the special treatment you deserve.
