

While you're here,
you'll own the place.

The legendary White River is one of the most highly sought after waters for epic trout fishing in Colorado and the US. We have one of the very best stretches, all 7.1 miles of it that includes three spring creeks and beaver ponds. That's a lot of water to fish, but if you stay for a long time you may get to it all. The K-T Ranch in Meeker is a world-class fly-fishing lodge with a restored Victorian ranch guest house built in the 1880s and comfortably filled with hospitality.

You'll find trout in current seams, above or below rocks, in back eddies, along blowdown, at the head and tailouts of pools, classic stuff. The difficult part is not hooking the fish, it's landing them. Once hooked, the trout dash and dart and try and put every piece of watercress and weed on your tippet. It's a dramatic style of fishing, and anglers may need to take a breather after they release their fish. After you fish the White River you'll want to come back again. And again. And again.
